#### **IV. Video Recording**

Each entrant shall provide a video recording of the piece/s they will perform for the competition. Students are encouraged to create the video with as high quality as possible as the video submission determines selection for the live final round. In addition to the audio provided by the video camera, it is highly recommended to record higher quality audio using external microphones and digital audio software, and then link the higher quality audio with the video in a program such as Adobe Premiere Pro or Davinci Resolve.

Students may process the image and audio with digital effects and tools if necessary, such as EQ, REVERB, COMPRESSION etc. but may not edit to fix live performance elements such as intonation, wrong notes, ensemble issues, etc). Recommended free version software platforms for video and audio editing are Davinci Resolve: <https://www.blackmagicdesign.com/products/davinciresolve/> and Pro Tools First: <https://www.avid.com/pro-tools>.

**The artistic quality of the performance is of paramount importance and the judges will be instructed as such in their evaluation and ranking of participants.**

**Students performing multiple works on different video clips should edit them into one video file.**

The repertoire presented shall be the same for the preliminary, and final rounds. The recording may only include the repertoire to be performed throughout the competition.
